Program Rationale: (Why is this program important?) This program establishes a sustainable ecosystem and develops an understanding in the student's minds how an ecosystem works. We can add and remove different plants to attract different insects and animals. It will also provide hands-on touch and feel and observation for the students and the parents that visit Mascotte Charter.
Program Impact: (How will the teachers and students benefit from this project?) This program will allow the teacher to introduce a subtropical environment to the students. The students will experience something at school that they possibly will never experience at home. They will also experience seasonal changes with the different types of plants and the insects and animals that visit them.
Program Evaluation Method: (How will you measure teacher and student success?) Test their depth of knowledge in open discussion at the growing site and in the classroom on the subject of natural science.
Program Timeline: (provide a project start date and completion date) Start date= December 10 th Completion date= May 23rd
