Program Rationale: (Why is this program important?)

Sawgrass Bay, a Title 1 school, implemented an art enrichment in the 2017-2018 school year. Many students do not get the opportunity to experience art and art materials at home. When the class began, our students embraced it and enjoy all of the projects we do. Therefore, having an art exhibit that allows some students the opportunity to display their hard work and feel proud of themselves is essential to having an art class.

Program Impact: (How will the teachers and students benefit from this project?)

This project will allow some students to display their work at our first annual art exhibit taking place during our S.T.E.A.M night. This exhibit will give many students an opportunity to build confidence in themselves and be excited about celebrating their creativity. Art is an expression and aids in developing critical thinking and academic performance.

PBS says, "A report by Americans for the Arts states that young people who participate regularly in the arts (three hours a day on three days each week through one full year) are four times more likely to be recognized for academic achievement, to participate in a math and science fair or to win an award for writing an essay or poem than children who do not participate."

Program Evaluation Method: (How will you measure teacher and student success?)

Students success is measured based on if the child was able to work independently, worked confidently and the desired result was reached. The teacher would know how successful the project was if the majority of the class was able to work and create fluently and without constant help or redirection.
