

Education Foundation of Lake County, Inc
2018-19 CTE Grant Application
Deadline to Apply: March 15, 2019

Basic Project Information

Principal Name:	Steven Benson
School Name:	South Lake High School
Teacher Name(s):	Cheryl Augustine
CTE Program Name:	Health Science
Grade levels:	12
Number of Students:	30 per year
Number of Participating Teachers:	1
Amount Requested:	\$2,957.80

Would you consider this a multi-year project? Our Certified Nursing Students practice all skills required for their training and passing of the exam on manikins. They begin learning all skills on the manikins in the beginning of the year they so when they are able to go to clinical sites and interact with live patients they have learned the skills prior. These manikins are used by every CNA class each year.

Project Abstract: All of our students learn skills that they have never had to perform on another person when they arrive in the CNA program. There are things like bed baths and perineal care (cleaning of the genitalia and rectal regions) that cannot be practiced on classmates for obvious reasons. They are required to know these skills when they arrive in the clinical settings and the manikins make this possible.

Project Detail

In the space below, please provide a detailed outline of your project activities. Please be sure to include the following: Goals and objectives of your project activities, expected timeline for project activities, when certification exams will be taken, etc.

The CNA program teaches students all skills necessary to gain employment as a nurses assistant post-secondary. The goal of our program is that all of our students are equipped with the ability to perform these skills safely, efficiently, and in compliance with standards set forth by the Board of Nursing. Students are taught the skills and then are able to practice the skills with the immediate feedback of the instructor to correct or gain their check off on each given skill. The students use the manikins to practice repeatedly so they know the skills completely and will be able to perform them correctly when they are required during their certification process. They must pass a written exam prior to the physical skills portion. The students are observed by two registered nurses from the testing facilitation company, ProMetrix, while they are performing the skills for their final test. Our goal is that all students will pass the test on their first attempt but when this is not the case, the students have access to the CNA lab to practice and remediate prior to retaking the exam. The certification testing takes place in late April each year prior to the student's graduation.

Outcome Measures

Outcomes (change/improvement in knowledge, behavior, skills scores)

What certifications are offered through this CTE program (is this a new or current certification offered at your school)?

The students may receive a Certified Medical Administrative Assistant (CMAA) certification as an 11th or 12th grader, or the Certified Nursing Assistant (CNA) certification as a 12th grader. These are current certifications offered at our school.

What is your target number of students receiving certifications that you are trying to reach?

For CMAA there are about 40 students per year. CAN has two classes of 15 students per year as this number is limited by the Board of Nursing.

Budget

Please do not submit a budget item that does not fit a category below or one that has not been approved by the EFLC staff. It will only delay the processing of your application.

NO GENERAL ADMINISTRATIVE OR INDIRECT CHARGES MAY BE APPLIED TO THIS GRANT.

Details

GERI has an elderly appearance with skin wrinkles and folds. Complete lifelike range of motion.

- Lightweight - approximately 28 lbs.
- Full-size adult manikin - measures 58
- Overall female appearance
- Converts to male with removal of wig and attachment of male genitals

Visual Inspection:

- Normal and cancerous mole
- Stage 1 sacral ulcer
- Dilated and constricted pupils
- Reddened skin folds

Patient Care Simulation:

- Bandaging and wound dressing
- Bed baths
- Clothing changes
- Denture placement and removal, upper and lower
- Ear canal irrigation, otic drops, and hearing aid placement
- Eye irrigation
- Finger and toe manipulation with bandaging - flexible and Individually molded
- Hair care washing and combing
- Intramuscular Injection sites: arm, thigh, buttock
- Oral and nasal hygiene: lavage, gavage, and suctioning
- Ostomy care: ileostomy and colostomy tissue

- Maintenance and appliance application, lavage, and suctioning
- Patient positioning
- Patient transfer techniques
- Pericare
- Tracheostomy care, lavage and suctioning
- Urinary catheterization female and male (uncircumcised)
- Enema administration female
- Prostate exam, stage B male
- Pap smears and douching
- Ostomy
- Black Skin Tone
